DETAILED ACTION

Election/Restrictions

1. Claims 20-27 are generic to a plurality of disclosed patentably distinct species comprising the various materials defining (e)(i) and the various materials defining component (f). The election of an ultimate species of the moiety X defining (e)(i) and an ultimate species of component (f) is requested. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. During a telephone conversation with Mr. Gerald Deitch on February 15, 2005 a provisional election was made with traverse to prosecute the invention comprising oxygen as the moiety X of (e)(i) and nylon as component (f), claims 20-27. Affirmation of this election must be made by applicant in replying to this Office action.

Claim Rejections - 35 USC § 112

3. Claims 20-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 20, the “(e)” and “(f)” notations are confusing in the absence of (a) – (d).

In claim 20, the characterization of “fifth” and “sixth” polymers is confusing in the absence of first, second, third and fourth polymers.

In the characterization of “third” and “fourth” reactive functional groups is confusing in the absence of first and second reactive groups.

In claim 20, “which may optionally containing” is awkward.

In claim 20, there is no express antecedent basis for “(b)” or “(a)”.

In claim 20, the metes and bounds of “a functional group” are indeterminate in scope.

In claims 24 and 25, “hydrocarbyl substituted hydrocarbyl” is not understood.

In claims 24 and 25, the metes and bounds of the “functional group” are indeterminate in scope.

In claim 27, it is unclear how the recited polymers can be definitive of the monomer (e)(iii).

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 20-27 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Application No. 10/766,412. Although the conflicting claims are not identical, they are not patentably distinct from each other because the lactone-based polymer of the present claims generically reads on the copolymer of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
